

Parent Helper Rota

We would like to invite all parents and carers to stay and help for the occasional session. Being part of our help rota will enable you to experience a Pre-School session. It allows parents to gain a view of their child's involvement and enjoyment within the Pre-School environment.

Involving parents in this way provides a number of advantages:

- The higher adult: child ratio in Pre-School helps to provide individual attention to address each child's needs and development.
- Parents who help in the group get to know what goes on and are in the best position to pick up on Pre-School learning at home.
- Watching their own child busy among the Pre-School activities and getting on with other children can give parents new insight into children's needs and abilities.
- Seeing their own parents involved in the Pre-School shows children that their parents value the Pre-School experience – and that they have a part to play in it.
- Children in Pre-School encounter contact with a wider range of adults, each with their own different skills and background.
